ABOUT ME

“Driven & versatile undergraduate student pursuing B.Sc. (Hons.) Computer Science at ARSD College, University of Delhi. Passionate about building projects that blend design, business, & technology. Skilled in HTML/CSS, Python, MySQL & Excel, with a growing interest in AI, data analytics, & product innovation. Known for a quick learning curve, problem-solving mindset, & the ability to adapt across diverse challenges. Eager to contribute to impactful projects, collaborate with dynamic teams, & turn ideas into actionable outcomes.”

WORK EXPERIENCE

STARKIFY (SPOTIFY SKIN) [BUILDING...]

- Designing a custom web-based Spotify “skin” using HTML, CSS, and JavaScript, integrating Spotify's Web API for real-time music playback control.
- Implements Play/Pause/Next controls, displays current track info, album art, and playlists, while providing a minimal, ad-free UI for Spotify Premium users.
- Showcases skills in JavaScript Fetch API, OAuth authentication, and API integration to create a seamless user experience.

MINI CHATAPP (SHA-256 & AES SECURED)

- Built a desktop chat application in Python using Tkinter for the GUI.
- Implemented e2ee with AES and SHA-256 hashing with sqlite for secure message storage and transmission.
- Used PBKDF2 key derivation and dual-key verification to strengthen password security and prevent brute-force attacks.
- Experimented with custom cipher logic (pad cipher & Vigenère hybrid) to understand encryption workflows beyond standard libraries.

SECURE DOWNLOAD MANAGER (AES ENCRYPTED)

- Built a Python-based file management tool in CLI that securely downloads and manages videos, PDFs, and images using yt-dlp and API integrations.
- Implemented AES encryption & SHA-256 hashing to encrypt all downloaded files and metadata before storing in SQLite database.
- Developed full CRUD functionality for user accounts & authentication with PBKDF2-based password security.
- On login, the system decrypts files for access, combining security and usability in a self-contained tool.
